SOFTWARE DEVELOPER/CLOUD-COMPUTING / FRONTED DEVELOPER

Salesforce Developer Consultant at EY with a strong mix of platform support and software engineering. Trusted for maintaining Salesforce stability, resolving production issues, and supporting deployments for a global agriculture client, earning top-performer recognition for four consecutive months. Brings hands-on experience building scalable cloud and web applications using React, Java, Python, and AWS, with a focus on clean code, APIs, and real, measurable impact.

EDUCATIONAL QUALIFICATIONS

Year	Degree	Institute/School	CGPA / %
2025	BE-CSE(H) Cloud Computing	Chandigarh University, Mohali, Punjab	8.64 / 10
2021	Intermediate	Kendriya Vidyalaya No. 1, Pathankot	95.4%
2019	Matriculation	St. Josephs Convent Sec School	91.6%

PROFESSIONAL EXPERIENCE

EY (Ernst & Young) – Salesforce Developer Consultant **July 2025 – Present**

Technology Consulting Practice | Hyderabad, India

Client: Leading Agriculture-Based Multinational

Role: Salesforce Customer Support Consultant

- Delivering end-to-end L1, L2, and L3 support for the Salesforce ecosystem, resolving complex issues across Sales Cloud and Service Cloud with a focus on scalable and robust solutions.
- Designing, developing, and maintaining high-quality Salesforce solutions using Lightning Web Components (LWC), Apex, and Flows, ensuring performance, reusability, and maintainability.
- Troubleshooting and resolving complex technical and functional issues related to user access, automation, integrations, and data integrity with high accuracy and minimal downtime.
- Managing Salesforce administration activities including user lifecycle management, roles, profiles, permission sets, and sharing rules, ensuring secure and optimized access control.
- Developing and enhancing custom components and automation frameworks to streamline business processes and improve system efficiency.
- Supporting data operations including imports, exports, transformation, and quality management using Data Loader and Data Import Wizard.
- Collaborating with cross-functional teams to analyze requirements, design solutions, and deliver new features, ensuring alignment with business goals.
- Supporting SAP–Salesforce integration, performing issue analysis using SAP T-codes (FFID, SE16N, MM02, XD03, VA02, VA03) and validating IDoc processing.
- Managing incident lifecycle through ServiceNow, ensuring timely resolution, clear communication, and SLA adherence.
- Writing and maintaining technical documentation, SOPs, and knowledge base articles to support system usability and operational efficiency.
- Participating in code reviews and best practice enforcement, ensuring adherence to coding standards and continuous improvement of software quality.
- Driving continuous improvement initiatives by identifying gaps, optimizing workflows, and implementing scalable enhancements.
- Staying updated with emerging technologies and incorporating modern development practices to enhance system capabilities.
- Recognized as a Top Performer for seven consecutive months for consistent delivery, technical excellence, and support quality.

SOFTWARE DEVELOPMENT INTERN – PERSONAL PROJECTS **Jan 2024 – Present**

- Worked on **10+ self-driven full-stack, cloud, and AI projects** simulating real-world applications.
- Applied Agile practices, performed self code reviews, and deployed projects using GitHub.
- Built scalable applications using frontend, backend, APIs, and cloud services.

SKILLS

Salesforce: Sales Cloud | Salesforce Administration | User Management | Security & Access Control | Data Loader | LWC | Apex | Deployments | UAT

SAP: SAP ECC | SAP T-Codes: FFID, SE16N, MM02, XD03, VA02, VA03 | IDoc Monitoring | SAP–Salesforce Integration Support

Programming Languages: C++ | Java | Python | SQL

Web Development: HTML | CSS | JavaScript | React.js

Cloud Services: AWS | Microsoft Azure | Google Cloud Platform (GCP)

Other Tools: Canva Design |API
Databases: MySQL | Oracle
Core Concepts: Data Structures & Algorithms (DSA) | Object-Oriented Programming (OOP) | DBMS | Operating System

KEY PROJECTS

Parking Management System : *Java | Swing | AWT | JDBC | MySQL | Twilio | JavaMail* (VISIT)

- Developed a real-time parking slot booking system with **role-based login, OTP verification, and receipt generation**.
- Integrated Twilio API and JavaMail to deliver WhatsApp and email notifications.
- Improved booking efficiency and transaction security by **30%**.

Fake News Detector : *Python | Machine Learning | HTML/CSS | JavaScript* (VISIT)

- Built a fake news detection web app using **logistic regression**, achieving **99.01% accuracy.**
- Implemented URL/text analysis and a user-friendly interface for real-time predictions.

Image Stitching using Seam Carving : *Python | OpenCV | Numpy | Feature Detection | Homography Function* (VISIT)

- Combined seam carving with homography-based blending for high-accuracy image stitching.
- Achieved **10% improvement in SSIM** (Structural Similarity Index) vs. traditional methods.
- Eliminated visual distortions by **removing false seams** dynamically.

Youtube Video Downloader *: Python | pytube* (VISIT)

- Created a GUI-based YouTube video downloader supporting multiple resolutions and user-defined download paths.
- Supported downloading of **50+ videos/day** with robust exception handling.

Cloud Application for Early detection of Cardiovascular Disease : *AWS Sagemaker | Kinesis | Python | Pandas* (VISIT)

- Processed **100,000+ records** using real-time streams and machine learning for heart disease prediction.
- Achieved **85% model accuracy**; used AWS services for scalable deployment and monitoring.

Additional Work:

- Currently deploying LWC-based Salesforce components.
- More projects available on GitHub

CERTIFICATIONS

- **Salesforce Agentforce Specialist** – Salesforce
- **Oracle Database Foundations Associate** – Oracle
- **Oracle Cloud Infrastructure Architect Associate** – Oracle Academy
- **Microsoft Azure Developer Associate (AZ-204)** – Coursera
- **Digital Transformation with Google Cloud** – Google
- **Foundations of Project Management** – Google
- **Problem Solving through Programming in C** – NPTEL
- **Public Speaking** – NPTEL

RELEVANT CONTRIBUTIONS

- **Solved 500+ LeetCode problems**, enhancing algorithmic thinking, data structures proficiency, and coding efficiency through regular problem-solving.
- **Contributed to a collaborative team environment** by performing frequent peer code reviews and sharing feedback to ensure clean, maintainable code.

SOFT SKILL

Effective communication | Cross-functional collaboration | Rapid learning & adaptability | Analytical & data-driven problem solving | Time management & prioritization | Code quality & solution delivery
